Projects

1.

URL: | github: https://glynismullankwok.github.io/musiclocations/

- Rock and Roam is an interactive website where users can enter the name of a city/state/country and get results of songs about the place. The results include lines to the lyrics, a map to the place, and a photo of the city.
- Rock and Roam is a front end app that allows the users to search lyrics by city /state/city. The response presents the users searched for different genres .
- Collaborated a key role in group work in templating html, styling css and ajax response appending to the page

2.

URL: | github: https://negasimichael.github.io/-Weather-Dashboard/

- Weather dashboard is a full stack app that allows users to search five days' weather forecast. Users can search different cities.
- Tools used: handlebars, css, javascript, jQuery

3.

URL: | github: https://negasimichael.github.io/Code-Quiz/

- Quiz Code app is a javascript based application developed for taking timed quizzes with multiple-choice questions. Users can escape or save grade scores, and clear and retake the quiz.
- Tools used: html, css and vanilla and ES6 javascript and local storage.
